

Awesome eMammal Volunteers

Welcome!

This is the home page for your team space within Confluence. Team spaces are great for sharing knowledge and collaborating on projects, processes and procedures within your team.

Welcome to the eMammal Volunteer Home Page!

Why what you are doing is important:

Researchers use camera traps to determine when and where different species can be found. When multiple camera traps are deployed, the result can be thousands of photos that must be processed (which can be time-consuming). By looking at the photographs first, you allow biologists to focus their efforts on analyzing the data. So thank you for your help, what you are doing is important and helps our researchers to be successful!

The team

Bontrager, Helen L.

Checklists for Volunteers

Below are the open projects that volunteers can help with.

Mongolia: <https://confluence.si.edu/display/AEV/Mongolia>

D.C. Cats: To Be Added
