Easy Forms

1 You can include a form, such as a sign up form, opinion poll, or similar in a page.

Responses

As the form creator, you will receive a notification (in your Confluence notification area - the bell icon by your profile image) every time someone fills out your form.

The data entered into your form can then be accessed via the easy form report.

Create a New Form

- 1. Create a new page and embed the easy form macro in it by clicking the +, selecting other macros then do a search for easy form
- 2. Name your form and choose settings you can
 - a. customize the message respondents receive after submitting the form
 - b. enforce one response per user (based on login)
 - c. let users edit their responses
 - d. restrict reports so only you see the responses
 - e. set an expiration date for the form
- 3. Save the page and your form will appear.
- 4. Click the edit button in the corner of the form and start adding form fields like check boxes, drop-downs etc.

Try it out with the form below

[This is an Easy Form that is rendered when this page is viewed in a web browser. The Easy Form has the title: Cheese Preference]

View and Export Form Responses

- 1. Create a new page and embed the easy form report macro in it by clicking the +, selecting other macros then do a search for easy form report
- 2. Specify the page you just created to host the report and the name of the form that is the source of your data
 - a. Check the box to Hide users if you want the report data to be anonymized
- 3. See below for a form report. Data can be exported in a variety of formats.
