

Getting started

Anyone with a valid Smithsonian network account can create an account in this Confluence by logging in with their network username and password.

On this page:

- [1. Create a page in your Personal Space](#)
- [2. Add sections to your page](#)
- [3. Add content from elsewhere in your site using macros](#)
- [3. Organize your site's pages](#)
 - [Change the page order](#)
 - [Add labels](#)
 - [Make templates](#)

1. Create a page in your Personal Space

- Navigate to your **personal space** by clicking on your avatar in the upper right corner of this page and choosing **personal space**
- Click **Create...** and select **Blank Page** to create your first page.
 - If you don't click the ellipses (...) but only click **Create**, it will default to a blank page
 - If you click the ellipses you can choose which page type (template) you'd like to use. See [Types of pages](#)
- New pages are created as children of the page you are currently viewing.
 - If you don't like where your page ended up in the site hierarchy, you can move it later (see below under "Organizing your site's pages").

2. Add sections to your page

- Click **Edit** to enter the Confluence editor
- Use the page layouts feature in the formatting bar to structure your content using sections and columns.
- You can manually add text, images, etc. to each section or you can use **Macros** to embed files, Tables of Contents or File lists into your page.
 - Click the **Insert** icon (+ sign) on the formatting bar to see a list of common content types (images, links, etc)

More information and how-to guides

3. Add content from elsewhere in your site using **macros**

- When editing your page click the **Insert** icon (+ sign) on the formatting bar and select "Other Macros" to add macros for navigation, special formatting and other media.

3. Organize your site's pages

Here are some tips for organizing your content.

- **Change the page order**

The sidebar on the left displays your pages in a hierarchy. If you have Space Administrator permissions you can click "Space Tools" > "Reorder Pages" to move pages around.

- **Add labels**

Labels help keep pages organized and make it easier for you to find the information you need. Click "Labels" at the bottom of a page to add or edit. The "Related pages" section on this page uses labels too!

- **Make templates**

Standardize and speed up the page creation process with templates. You can create and format a template with page layouts, standard headings and instructional text for hints and guidelines. Check out our sample page on "[Making a template](#)"

Now that you've given it a test drive, go ahead and

[Create a new space](#)
